8MM SLIM WALL & FLOOR TILES

400X800MM

## DESIGN, PATTERN & VARIATION GUIDE

Current development efforts have made ceramic tiles to resemble and look authentically identical to natural materials (stone, wood, fabric), and it has become increasingly difficult in many cases, to distinguish between the two.

Recognising this situation, it is necessary to be informed on the grade of design & pattern variation that is expected from these products. As a general reference, the design & pattern Guide below classifies a scale of ranges according to the degree of the variation.

The classification is as follow:

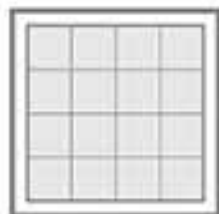

**V1** Minimal Variation

**V2** Slight Variation

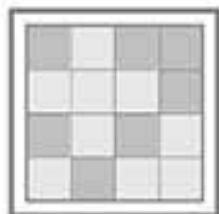

**V3** Random Variation

**V4** Substantial Variation

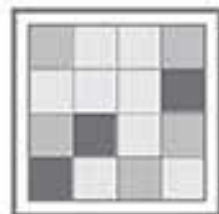

**★** For Roto Color Printing Variations are marked as R1, R2 & R3

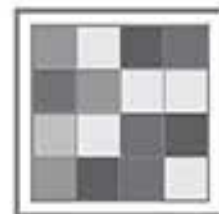

**V1** Uniform appearance

**V2** Slight variation

**V3** Moderate variation

**V4** Substantial variation
