BATHWARE & KITCHEN SINK 2016

RAK Ceramics' Bathware includes an elegant range in wash basins (mounted and pedestal), bathroom suites - wash basins, water closets and bidets (close coupled, back-to-wall and wall hung), water closets adapted for customers with special needs, bath tubs, shower trays, kitchen sinks and exquisite designer faucets from Kludi RAK.

RAK Ceramics Tiles includes coordinated ceramic/porcelain wall and floor tiles, high gloss vitrified tiles, specialist tiles (including bespoke and large sizes), swimming pool tiles, décor and listello, pencils and capping, floor mosaics, borders and corners. With new designs being added on a weekly basis, RAK Ceramics offers the largest selection of products in the industry.

THE COMPANY

RAK Ceramics is the largest ceramics manufacturer in the world. With a global annual production output of 117 million square metres of ceramic and porcelain tiles, 4.6 million pieces of bathware and 24 million pieces of tableware, RAK Ceramics is a USD 1 billion company that supplies to over 160 countries.

Established in 1991 by H.H. Sheikh Saud Bin Saqr Al Qasimi, Ruler of Ras Al Khaimah and UAE's Supreme Council Member and H.H. Sheikh Mohammed Bin Saud Al Qasimi, Crown Prince of Ras Al Khaimah and the Chairman of RAK Ceramics, under their vision and leadership the Ras Al Khaimah based company has enjoyed rapid growth and is now globally recognised as a world-class leader in its field.

Now under the strategic leadership of CEO Abdallah Massaad, RAK Ceramics is continuing to position itself as a premium international brand.

- In addition to its vast range of Ceramic tiles, RAK Ceramics manufactures a comprehensive range of environmentally friendly bathware products. From the world's smallest water closets, to the most exclusive designer collections, and everything in between, the RAK Ceramics bathware collection exceeds international standards and is reputed to be the largest selection of environmentally friendly bathware products in the world.
- The RAK Ceramics Bathware range includes European P-trap/different distance S-trap water closets; close coupled, back to wall and wall hung water closets, bidets, and wash basins; pedestal, wall-hung, semi-counter and counter wash basins in a variety of sizes; acrylic bath tubs; shower trays; urinals; water closets for customers with special needs; fire clay kitchen sinks and specially designed junior collections.
- RAK Ceramics is an ISO 9001:2008 and ISO 14001:2004 certified organisation. The company was a founding member of Emirates Green Building Council (EGBC), which supports the development of sustainable buildings in the region. The UAE Ministry of Environment and Water (MoEW) awarded RAK Ceramics with the Environmental Performance Certificate (EPC) in recognition of its successful efforts to comply with environmental protection standards and regulations.
- RAK Ceramics has been accredited by the National Association of Testing Authorities (NATA) in Australia. The accreditation means that RAK Ceramics sanitaryware testing laboratory complies with NATA requirements and operates in accordance with ISO/IEC 17025. The accreditation also means that RAK Ceramics' sanitaryware products adhere to Australia's Water Efficiency Labelling and Standards Scheme (WELS), and demonstrates RAK Ceramics' continued commitment to environmental conservation.
- RAK Ceramics is the fastest growing ceramics manufacturer in the world. Global production of tiles exceeds 360,000 sq.m. and 12,000 pieces of sanitaryware per day from its 10 state-of-the-art plants in UAE and 1 plant each in China, Bangladesh, India and Iran. RAK Ceramics manages around 7,000 employees in the UAE, 14,000 employees worldwide and currently exports to more than 160 countries.

VISION

To maintain its status as **world’s leading innovator** in ceramic field

MISSION STATEMENT

Our Responsible And Knowledge-driven mission statement includes:

- C** - Close to our clients by listening to their needs and adapting to market requirements
- E** - Excellence in producing high-quality products that offers best value-for-money
- R** - Redefining the product innovation and design process
- A** - Accountable to its clients, trade partners, stakeholders and employees
- M** - Motivate employees to develop them into future entrepreneurs
- I** - Integrity of the management towards the organisational goals
- C** - Committed to improving society by contributing towards a healthy environment
- S** - Sustainability in every sphere of business

QUALITY

Quality Standard ISO 9001:2008

RAK Ceramics has been assessed by Bureau Veritas Certification, UK and gained ISO 9001:2008 Certification under the terms of the scheme for Supplier Quality Management.

The quality standard relates to design, development, production and supply of ceramic and porcelain floor and wall tiles, porcelain slabs, vitreous china and fire clay sanitaryware including acrylic bath and shower bases, and ABS resin toilet seats and covers.

The International Association of Plumbing and Mechanical Officials Research and Testing (IAPMO R&T) Certificate of Listing, and the Water Efficiency Labelling and Standards Scheme (WELS) water ratings showing three/four stars cover selected products from this catalogue. A complete list of certified products can be provided upon customers request.

Product Specification

The company name RAK Ceramics and the product names listed in this catalogue are trademarks of RAK Ceramics, United Arab Emirates. RAK Ceramics pursues a policy of continuous improvement in the design and performance of its products. Therefore we reserve the right, without notice, to vary any specifications and/or colour ranges contained within this catalogue.

MANUFACTURING PROCESS

VITREOUS CHINA

Vitreous China Sanitaryware products are manufactured using high quality ball clay, kaolin clay, silica sand, and feldspar. The raw materials are quality tested in our onsite laboratory before being taken for production. The non-plastic raw materials (silica sand and feldspar) are crushed before undergoing a wet milling process in the ball mill. The mix is transferred to a high-speed blunger, where the clay is added and the resulting 'body slip' is blunged for two hours to achieve a homogeneous mix. The mix is passed through a vibrating sieve attached to a fine mesh, with powerful magnets to remove impurities, before being finally moved to the storage arc. After testing the rheological properties, the body slip is transferred to the required casting departments.

The sanitaryware products are manufactured using three different types of casting process: medium or high-pressure casting, battery casting or traditional casting. The majority of RAK Ceramics sanitaryware products are produced using medium or high pressure casting in resin moulds, which results in very high quality products due to the atomisation process involved.

The casted products are arranged on trolleys to undergo a natural drying process of 24 to 48 hours depending on the size of the product. The products are then given a smooth finish before being sent for further drying in tunnel/chamber dryers for another 10 to 12 hours in order to achieve a moisture content of less than one percent. The dried pieces are inspected before undergoing the glazing process. During inspection, each and every piece will be checked for technical flaws before being transferred to the glaze-spraying booth, where they are coated with an impervious, non-crazing vitreous glaze.

The glazed pieces are placed on kiln cars before being transferred to the shuttle or tunnel kilns for firing at a very high temperature of 1220 ° C. The combination of materials used, the processes and firing at such a high temperature create Vitreous China Sanitaryware with water absorption of less than 0.5% of the dry weight.

The final product then undergoes a range of different quality checking/testing procedures including a visual quality check; a dimensional check; and tests for leakage, crazing, burning, acid resistance, staining, and water absorption. In the final stage for water closets, the cistern will be fitted in-house with the approved flush mechanism before the finished product is shipped.

Vitreous China is highly hygienic, fireproof, stain-proof, rustproof, non-fading and is also resistant to acids and alkalis.

FIRE CLAY

Fireclay Sanitaryware products are manufactured using ball clay, kaolin clay, quartz and pre-fired clay. The clays are processed in the blunger for one hour to achieve a homogeneous mix. The final 'fireclay slip' is passed through a mesh with powerful magnets to remove impurities, before being finally moved to the storage arc. The remaining manufacturing processes are the same as of Vitreous China products.

In general, fireclay slip will be used to produce heavy-duty large size wash basins, kitchen sinks, service sinks, and lab sinks where shape retention is critical.

RAK BATHWARE

PLAYS ITS ROLE FOR A BETTER ENVIRONMENT AND SOCIETY

Saves 33% in water consumption using the latest flush systems in water closets.

Compact, elegant designs ensure space-saving in bathrooms by 20-40% depending on bathware models.

Utilises recycled, natural raw materials to help conserve natural resources.

Adopts Clean Development Mechanism (CDM) projects to reduce carbon emissions during the manufacturing process.

Each consumer-friendly bathware piece is :

- Highly hygienic
- Stain and rust proof
- Resistant of acids and alkalis
- Maintenance-free

Specially designed bathware is produced exclusively for customers with special needs.

■ The ultimate **In Hygiene** for your home

Compact Rimless delivers the ultimate in hygienic bathrooms. Based on similar design specifications to sanitaryware in hospitals and medical centres, Compact Rimless allows you to experience the same high standards of hygiene in your own home.

RAK Ceramics continues to set new standards of hygiene and water efficiency in the sanitaryware industry, with uniquely engineered water flushing systems that effectively remove waste, helping to keep bathrooms fresh and hygienic.

BATHROOM SUITES

Compact *Rimless*

COMPACT RIMLESS OFFERS

HYGIENE

The water closet has no rims to harbour germs, making cleaning quick, easy and more hygienic.

WATER EFFICIENCY

Using just 4 litres for the full flush and 2.5 litres for the half flush, water usage is reduced by a third. Standard flush volumes are 6 litres (full flush) and 3 litres (half flush).

EASY CLEANING

The contoured shape of the water closet allows easy reach for convenient cleaning without the need for specialist cleaning products.

COMFORT HEIGHT

With an extra 50mm on the height of the pan, the water closet is suitable for those who need less distance to rise and lower themselves.

- A** No ledges or rim ensure even water circulation up to the front of the bowl for better cleansing.
- B** Effective cleansing and water saving properties are compliant with the Water Regulations Approved Scheme (WRAS).
- C** The dynamic and strong water flow provides outstanding flushing results while preventing splashing.

Compact *Rimless*

Venice Waterless Urinal Bowl

Code	Description
VN21AWHA	VENICE WATERLESS URINAL BOWL
FS37UK	FIXING KIT
FS10WUPK02	WASTE PIPE KIT FOR WATERLESS URINAL 1 1/2"
FS10WUKVRAK	WATERLESS URINAL KEY VALVE E ART 104005
FS10WUKARAK	WATERLESS URINAL KEY ADAPTOR ART 107005
FS10WUCN	WATERLESS URINAL COUNTER NUT ART 108000
FS10WUSK	WATERLESS URINAL SERVICE KEY, 106000

Features:

- no water flush required
- allows liquid to flow into the drain, but prevents backflow of drain gases
- vertical mechanism
- compact unit
- easy to handle
- total life span of fey valve, approx. 7500 usage
- the green Key-Ring® is the optical life cycle indicator, it keeps the Key-Membrane flexible and clean and create in addition a pleasant scent
- the green Key-Ring mass is fully biodegradable
- the Key-System prevents the forming of scale and hard deposits in the drain

Service

The Key-Valve E is a consumable. For proper operation, it must be replaced in accordance with the rate of usage. Using the Service-Key, the Key-Valve E can be quickly and easily replaced without any problem.

Application Area

The patented Key-Valve® E is the heart of the Key-System® and was developed specifically for use in waterless urinals. Without the use of water or other sealing liquids, it seals the drain opening to prevent the emission of odors from the drain.

Depending on the rate of urinal usage, the Key-Valve must be replaced 2 to 3 times a year. Thus each Valve can save up to 20,000 – 40,000 liters of water.

Technology

The Key-Valve works using Bernoulli's principle. Aided by adhesion of the moistened Key-Membrane®, the Key-Valve E remains permanently airtight. There is practically no risk of drying out because of the moist air in the drain line.

With the Key-Valve, no siphon is required in the drain line. If a conventional siphon is in place, it does not affect the Key-Valve E.

The Key-Valve E automatically balances negative pressures in the drain line because the Key-Membrane allows air to flow into the drain. When the line is under pressure the Key-Membrane closes tight.

The Key-Membrane is made out of a special silicone rubber compound and possesses exceptional chemical and mechanical properties. Polar liquids such as alcohol and ketone – virtually all types of cleaner – do not damage the Key-Valve E.

Non-polar liquids such as mineral oil and gasoline would significantly impair the function and reduce the service life of the Key-Valve E. Larger pieces of debris are caught by the Key-Valve E cover. Smaller particles are separated horizontally by the patented design of the Key-Membrane.

For the daily cleaning procedure, a pH neutral surface cleaner is required. No need for harsh cleaning detergents.

Life Span

The Key-Valve E can be stored in its original package at 15-25°C for one year (12 months). The Key-Valve has a min. flow rate of about 1.25 liters/minute, which can drop over the usage period.

It is guaranteed that each installed Key-Valve will last for approx. 7,500 usages. Cleaning detergents and drainpipe gases lead to aging of the Key-Membrane, as they reduce elasticity.

Meadows Wall Hung Furniture For Table Top Wash Basin

(Furniture with Infinity Wash Basin)

(Furniture with Harmony Oval Wash Basin)

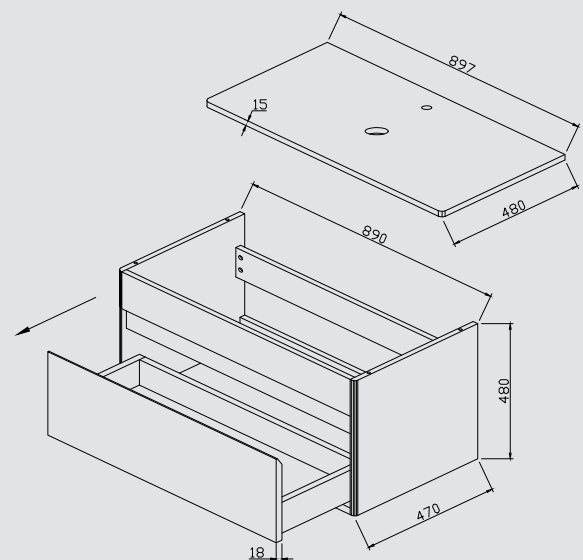

(Furniture with Harmony Rectangular Wash Basin)

Features:

- Made of E2 MDF and coated with superior quality furniture lacquer
- Resistant to water and extreme (low/ high) temperature
- Fashionable handle made of stainless steel
- Maximum weight capacity: 40KG
- Smooth running and soft closing of drawer for up to 100,000 usages
- Quiet operation of drawers
- Full pull out drawers
- 1 year limited warranty against any manufacturing defect *

Maintenance:

- Wipe clean with a water dampened soft cloth and a mild non- abrasive soap, if necessary
- Wipe dry with a clean cloth
- Wet marks should always be dried off as soon as possible to stop moisture penetration
- Do not use burnishing powder, steel wool, hard or sharp tools which can scratch the surface
